Creative techniques &gt; Reassembly methodologies &gt; Test 6. Reassembling methodologies

## Test 6. Reassembling methodologies

THIS CONTENT IS GRADED AS 'TEST'

WEIGHT: 1.0

Bookmark this page

### Test

1.0 point possible (graded, results hidden)

Defined terminal infrastructure values in context

☐ Set of technological connections.☐ Sign and symbol systems☐ Management Data Infrastructure and Ideas☒ All answers are correct☐ There are no correct answers

Define the meaning of the term archive in the context of a method

☒ Conditional Storage☒ Place of classification and information processing☐ Information Recording Technology

☐ All answers are correct

☐ There are no correct answers

Define a server function in a method context

☒ The server distributes and tracks

☒ The server collects and analyzes data using specific patterns of behavior

☐ The server is an input filter

☐ All answers are correct

☐ There are no correct answers

Define the multiplier function in the context of the method

☐ Enhances the potential of one thread, due to another

☒ Enhances system performance

☐ Joins forces of two or more systems

☐ All answers are correct

☐ There are no correct answers

Define the function of the switch

☒ Enhances the potential of one thread, due to another

- ☐ Enhances system performance
- ☐ Joins forces of two or more systems
- ☐ All answers are correct
- ☐ There are no correct answers

What is the conceptual basis of the “rebuild” parameter

- ☒ Transferring the principles of organizing one system to another
- ☐ Using the components of one system to create a new system based on them
- ☐ Combining components of different systems
- ☐ All answers are correct
- ☐ There are no correct answers

What is the algorithm of actions when using the “reassembly method”

- ☒ Analysis of the electronic system infrastructure - creating a flowchart - applying principles to solve problems in the new system
- ☐ Creating a flowchart - changing the sequence of component relationships in a flowchart - applying principles to solve problems in the new system
- ☐ Creating a flowchart - reformulating a task - finding a suitable electronic system by selection
- ☐ All answers are correct

☐ There are no correct answers

The following elements are indicated in text materials: libraries, warehouses, docks, landfills. What type of components are these?

☒ To archives

☐ To servers

☐ To switches

☐ All answers are correct

☐ There are no correct answers

Cars, elevators, mobile phones, laws?

☐ To archives

☐ To servers

☐ To switches

☐ All answers are correct.

☒ There are no correct answers.

What type are intersections, satellite systems, traffic lights?

☐ To archives

☐ To servers☒ To switches☐ All answers are correct☐ There are no correct answers
